DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-47, drawn to color conversion coefficient preparation, classified in class 358, subclass 1.9.
- II. Claims 48-54, drawn to color data processing, classified in class 358, subclass 2.1.

1. The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05 (c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention in regards to Group I discloses preparation of color conversion coefficient using first and second TRC preparation and K preservation n-dimensional DLUT preparation. The subcombinations processes color data using a first and second source side input section, a first and second target side input section, a selection instruction section and color data conversion.

Art Unit: 2626

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
